

Lab 2

o Mention 1 or 2 Functional requirements and 1 or 2 non-functional requirements of the Student Registration System.

Functional Requirement: The system should give students the option to add or drop courses.

Nonfunctional requirement: The system should support 500 simultaneous users per add/drop time slot.

o Write two functional requirements and two non-functional requirements of online store. Discuss the requirements with other students and exchange comments, then ask the engineer to review them.

Functional Requirement: The online store should allow customers to add items and checkout.

Functional Requirement: The online store should ask customers for email and password upon login.

Nonfunctional requirement: The online store should allow a maximum of 50 of the same item in cart.

Nonfunctional requirement: Only employees and managers should be permitted to add items in the stock.
